TECHNOLOGY

JOURNAL OF
The Polymer Processing Institute

The Polymer Processing Institute (PPI) is an independent research corporation headquartered at NJ Institute of Technology and strong links with the Institute of Polymer Technology and materials engineering of Loughborough University (UK). Its mission is to assist industry by advancing knowledge in the field of Polymer Technology and related areas through sponsored research, development, and education, and to disseminate information via all appropriate mechanisms for technology transfer.

Contents of Volume 19

Number 1, Spring 2000

FEATURES

Visualization Studies on the Comparison of Mixing Characteristics of Single-Screws Having Different Mixing Elements 1
A. C-Y Wong, J. C. M. Lam, T. Liu, and F. Zhu

Drop Breakup in Combined Shear and Extensional Flow Conditions 14
F. D. Godbille and J. J. C. Picot

Mixing Analysis of Reactive Polymer Flow in Conveying Elements of a Co-Rotating Twin Screw Extruder 22
David Strutt, Costas Tzoganakis, and Thomas A. Duever

On the Production of Compatibilized Polyethylene Terephthalate-Styrene Butadiene Rubber Blends 34
A. Sánchez-Solís, M. R. Estrada, M. J. Cruz, and O. Manero

Compatibilization of PBT/Polyolefin Blends: Mechanical and Dynamic Mechanical Properties 41
D. Nabi Saheb and J. P. Jog

Improving Incorporation of Fillers in Plastics. A Special Report 54
David B. Todd

DEPARTMENTS

News from the Polymer Processing Institute 65

Number 2, Summer 2000

FEATURES

Temperature Distributions of Molten Polypropylene During Injection Molding 79
N. Sombatsompop and W. Chaiwattanpipat

Surrounding Temperature Effects on Extruded Polyethylene Foam Structure 87
S.-T. Lee and K. Lee

Growth of Gas Bubbles in the Foam Extrusion Process 97
Chong Hoon Lee, Ki-Jun Lee, Ho Gab Jeong, and Seong Woo Kim

Thermal Behavior and Electrical Conductivity of Poly(Vinyl Pyridine)/Copper Complexes 113
J. R. S. Rodrigues, D. Gonçalves, A. S. Mangrich, V. Soldi, J. R. Bertolino, and A. T. N. Pires

Degradation Mechanism and Kinetics of a High Thermally Stable Aromatic Polyamide 120
Arturo Horta, José Coca, and Fernando V. Díez

Processability, Mechanical Properties, and Electrical Coonductivities of Carbon Black-Filled Ethylene-Vinyl Acetate Copolymers 132
Jan-Chan Huang and Chin-Long Wu

DEPARTMENTS

News from the Polymer Processing Institute 140

Number 3, Fall 2000

FEATURES

Numerical Simulation of Rheological Effects in Fiber Spinning 155
Evan Mitsoulis and Michel Beaulne

Numerical Characterization of Mold Injection in Resin Transfer Molding Process 173
Yean-Der Kuan and A. Sherif El-Gizawy

Compatibilization of Polypropylene–Polystyrene Blends: Part 2, Crystallization Behavior and Mechanical Properties 180
Akin A. Adewole, Anthony Denicola, Costas G. Gogos, and Leno Mascia

Microwave Radiation Curing of Polymers: Using a Temperature Equivalent Method for Cure Reaction Analysis 194
F. Y. C. Boey and Santosh Kumar Rath

A Model Process for the Recycling of a Surlyn® Ionomer 203
J. G. Poulakis and C. D. Papaspyrides

Swelling Behavior of Poly(N-vinyl-2-pyrrolidone) and Poly(N-vinyl-2-pyrrolidone)/$K_2S_2O_8$ Hydrogels in Urea Solutions 210
Hatice Kaplan and Ali Guner

DEPARTMENTS

News from the Polymer Processing Institute 218
Surface Analysis News from Loughborough University 232

Number 4, Winter 2000

FEATURES

Chemical Modification of Low Density Polyethylene Through Reactive Extrusion: Part I: Process Development and Product Characterization 237
Stuart A. Nield, Costas Tzoganakis, and Hector M. Budman

Structure-Property Relationships of Injection- and Compression-Molded Microfibrillar-Reinforced PET/PA-6 Composites 249
M. Evstatiev, S. Fakirov, G. Bechtold, and K. Friedrich

Rheology of PA-6/EPM/EPM-g-MA Blends Along a Twin-Screw Extruder 260
J. A. Covas, A. V. Machado, and M. Van Duin

Computation of the Linear Viscoelastic Relaxation Spectrum from Capillary Viscosity Data 277
M. Zatloukal, J. Vleck, C. Tzoganakis, and T. Dobbie

The Importance of Plastic Energy Dissipation (PED) to the Heating and Melting of Polymer Particulates in Intermeshing Co-Rotating Twin-Screw Extruders 287
Bainian Qian and Costas G. Gogos

Effects of Supercritical CO_2 on the Viscosity and Morphology of Polymer Blends 300
Minhee Lee, Costas Tzoganakis, and Chul B. Park

The Electret Effect in Polypropylene Fibers Treated in a Corona Discharge 312
A. Kravtsov, H. Brünig, S. Zhandarov, and R. Beyreuther

DEPARTMENTS
